Description
<ul style="list-style-type: none"> <li><a href="#">Screen Recording 2025-01-25 at 16.55.25.mov</a> Type:* Bug</li> </ul> <p><b>Priority:</b> High</p> <p><b>Status:</b> Open</p> <p><b>Assigned To:</b> Alla Vorobei</p> <p><b>Environment:</b>  Chrome 131.0.6778.266, Edge 132.0.2957.115, Safari 20619.2.8.11.12, Firefox 134.0.1</p> <p><b>Preconditions:</b>  The Amazon homepage is loaded successfully. The Developer Tools are opened.</p>

**Steps to Reproduce:**

Open the Amazon homepage on a desktop browser.  
Resize the browser window to different screen widths (e.g., 1024px, 768px, 320px).  
Observe the layout behavior for widths narrower than 800px.

**Expected Results:**

The website layout adjusts seamlessly to different screen sizes.  
All key elements (navigation menu, CTAs, product details) remain visible and functional.  
No horizontal scrolling is required on any screen size.

**Actual Results:**

On screens with a width of less than 800px the layout is misaligned.  
Horizontal scrolling is required.  
The issue occurs in Chrome, Edge, and Safari but does not reproduce in Firefox.  
The website is not fully responsive for smaller screen sizes.

**Reproducibility:**

Affected Browsers: \_Chrome, Edge, Safari.

Not Affected: Firefox.
