Usability & Accessibility

Test Cases

Test Cases   5

C24: Check intuitiveness of navigating between pages

Type	Priority	Estimate	References
Usability	High	None	None
Automation Type			
None			

Preconditions

The user is registered and logged in.
The Amazon homepage is loaded successfully.

Steps

| 1	Navigate to the homepage by clicking the logo in the left top corner.	The home page appears.
2	Click on the "All" dropdown menu and select a category. Click the "Search" button.	The page with a list of products from a selected category appears.
3	Click on a product to open its details page.	The product page appears.
4	Use the browser's back button to return to the previous page.	The previous page appears.
5	Navigate to the cart and then return to the homepage using the Amazon logo link.	Navigation between pages is seamless and intuitive. No delays or errors occur while moving between pages.

C25: Test the visibility of critical CTAs

Type	Priority	Estimate	References
Usability	Critical	None	None
Automation Type			
None			

Preconditions

The user is registered and logged in.
The Amazon homepage is loaded successfully.

Steps

1	Navigate to a product details page.	The product page appears.
2	Verify the visibility of the "Add to Cart" button.	The "Add to Cart" button is prominently visible on the product details page.

| 3	Add the product to the cart and navigate to the cart page.	The cart page appears.
4	Verify the visibility of the "Proceed to Checkout" button.	The "Proceed to Checkout" button is prominently visible on the cart page.

C26: Verify compliance with WCAG guidelines on the homepage: links and buttons.

Type	Priority	Estimate	References
Accessibility	Critical	None	None
Automation Type			
None			

Preconditions

A screen reader tool VoiceOver is installed and running.
The Amazon homepage is loaded successfully.

Steps

1	Enable the screen reader tool.	The screen reader tool is running correctly.
2	Use the tab key to navigate through the homepage.	The navigation is available and works predictably.
3	Ensure all interactive elements (e.g., links, buttons) are focusable and have descriptive labels.	All interactive elements are navigable and labeled appropriately.

C27: Verify compliance with WCAG guidelines on the product page: images

Type	Priority	Estimate	References
Accessibility	Critical	None	None
Automation Type			
None			

Preconditions

A screen reader tool VoiceOver is installed and running.
The Product page is loaded successfully.

Steps

1	Enable the screen reader tool.	The tool is running correctly.
2	Use the tab key to navigate through the product page.	The navigation is predictable.
3	Verify that images have appropriate alt text.	Images have descriptive alt text.
4	Ensure no content is hidden from screen readers.	The screen reader can interpret all visible content.

C28: Responsiveness tesing

Type	Priority	Estimate	References
Usability	High	None	None
Automation Type			
None			

Preconditions

The Amazon homepage is loaded successfully.
The Developer tools are opened.

Steps

1	Open the homepage on a desktop browser and resize the window to different breakpoints of widths: 1024px 768px 320px	The website layout adjusts seamlessly to different screen sizes.
2	Verify that all key elements (e.g., navigation menu, CTAs, product details) are displayed correctly and remain functional.	All key elements are visible and functional across devices.
3	Check that no horizontal scrolling is required on any type of device: desktop tablet mobile phone	No horizontal scrolling is needed at any screen size.
